Major Activity-3: Practicum- Diagnostic Testing

Course Objective:

1. To develop awareness of psychological of psychological tools, techniques and tests.
2. To nurture the skill of observation.
3. To develop skill of report writing.

Course Outcome: After the completion of the course the students will be able to-

1. Aware of different psychological tools and techniques of assessments
2. Skillful in observation
3. Write report effectively.

Conduct tests from the following

A. Paper pencil (Any Two)

1. Clinical Analysis Questionnaire
2. Beck's Depression Inventory.
3. MMPI
4. NEO-PI

B. Projective (Any Two)

1. Rorschach
2. TAT
3. CAT

C. Intelligence Test (Any Two)

1. WAIS/ WISC
2. MISC
3. SPM
4. BKT

NOTE- Each tests should be conducted on at least three clients / subjects

PRACTICUM ASSESSMENT (50MARKS)

Internal examination of 20 marks

The record book-10

Attendance -10

Internal examination will be carried out by the departmental committee.

External examination of 30 marks

The procedure -10, Report-10, Viva-10

Major Elective-3: a) Healthy Psychology

Course Objective-

1. Learn the definition and scope of Health Psychology
2. Able to identify types of pain, symptoms and suitable intervention
3. Understand theories of stress, sources of stress and coping

Course Outcome- After the completion of the course the students will be able to-

1. Outline the definition and scope of Health Psychology
2. Identify types of pain, symptoms and suitable intervention
3. Summarize theories of stress, sources of stress and coping

Unit	Course Content	Periods
I	What is health Psychology? Definition of Health Psychology, The Mind Body Relationship: A Brief History, The Rise of The Biopsychosocial Method, The need for Health Psychology, Health Psychology Research, What is health Psychology Training For?	16

Research Project- Research Project

Course Objective-

1. To apply research methods to solve a given scientific task.
2. To collect data for evaluation and for statistical treatment.
3. To use relevant scientific literature and write the report.

Course Outcome- After the completion of the course the students will be able to-

1. Use research methods to solve a given scientific task.
2. To collect data for evaluation and use statistical treatment.
3. Write the research report.

General Notes:

1. Each batch of project should consist of maximum 10 students.
2. A separate batch will be formed if this number exceeds even by one.
3. Workload for each batch will be equivalent to 8 lecture periods.
4. Students should select a problem in consultation with teacher concerned.
5. Sample size should be minimum 30 in each group .
6. Project report should be written in APA format.
7. Eligibility for the Project Examination is subject to Certification of Project by the teacher-in-charge and HoD.

Internal Assessment – 40marks

Division of marks for project report will be as follows and will be based on suitability and appropriateness of the report with respect to:

1. Problem selected, its rationale and significance & Review work –10
2. Methodology- 10
3. Data Collection-10
4. Result Interpretation- 10

External Examination – 60 marks

1. External Examination will be conducted by two examiners (one of whom will be preferably internal and one external)
2. Each batch will consist of only 10 students
3. Duration of examination for each batch will be 3 hours.
4. Marks for Project Report and Presentation & Viva-voce will be given by both examiners and the average of the same will be considered as final marks of the candidate.

Fourth Semester– Clinical Psychology

Major Mandatory-10: Psychopathology

Course Objective: To acquaint the students with:

1. Current systems of classification of Mental Disorders.
2. The symptomatology of different psychological disorders.
3. The etiology and dynamics of the disorders with respect to various theoretical approaches.

Course Outcome- After the completion of the course the students will be able to-

1. Classify the Mental Disorder
2. Know the symptoms of psychological disorder
3. Understand the theoretical approaches

Units	Course Content	Periods
I	Eating disorders and obesity Clinical aspects of eating disorders, DSM-5 described eating disorders: Anorexia Nervosa, Bulimia Nervosa, Binge- Eating disorder, Age of onset, gender differences, risk & causal factors and treatment of eating disorders, The problem of obesity: Medical issues, Definition and prevalence, Yogic management of obesity, Weight stigma, risk & causal factors, treatment of obesity.	10

Major Elective-4: a) Community Healthy Psychology

Course Objective-

1. To enable students to understand basic concepts of community healthy psychology.
2. To train students to identify and appreciate the strengths of community.
3. Learn applications and implications of community health psychology concepts.

Course Outcome- After the completion of the course the students will be able to-

1. Understand basic concepts of community healthy psychology.
2. Identify and appreciate the strengths of community.
3. Applications and implications of community health psychology concepts.

Unit	Course Content	Periods
I	Community Health: Concept, History, Approaches, Public Health Policies: WHO, National	15
II	Health Inequalities and Community Health Programme: Health differentials; Issues related to poverty, Minority status and health; Gender and Health; Work and health; Community health programme and evaluation	15
III	Community Health and Hazards: Health habits and health behavior; Food habits, Health risk behavior (use of Tobacco, Alcohol, Drugs), Strategies for changing health risk behavior (cognitive, behavioral, motivational, emotional approaches), Reproductive health, Health promotion and disease, Prevention: Applications of Psychological principles 1 Behavioral change approach, Self empowerment, Community development	15
IV	Community Health Care: Health seeking behavior (screening for disease detection); Immunization; Predicting health behavior (influences on health behavior)	15

Major Elective-4: b) Rehabilitation Psychology

Course Objectives-

1. Understand the Disability sector and its rehabilitation.
2. Professional understanding of the disabled, its causes, concerns.
3. Learning the management and intervention need with scientific approach.

Course Outcome

1. Knowledge of the Disability sector and its rehabilitation.
2. Learn the disabled, its causes and concerns.
3. Skillful management and intervention need with scientific approach.

Unit	Course Content	Periods
I	Nature and Scope of Rehabilitation psychology: Definition, historical perspective, scope and methods, Functions of Rehabilitation Psychology: General functions and special functions, History and Philosophy of Disability Rehabilitation • Goals and objectives of rehabilitation, Multi-disciplinary approach to rehabilitation: Biological, medical, psychological, educational and social aspects.	15
II	Disabilities: • Disability - Concept and definitions, Classification of various disabilities, Incidence and prevalence • Types of disabilities: Visual impairment, Hearing and speech impairment, Locomotor disability, Mental retardation, Cerebral palsy, Autism, Mental illness Learning disabilities, Multiple handicaps • Etiological factors; pre-natal, natal and post-natal, chromosomal aberrations and genetic errors • Prevention of disabilities	15
III	Personality Development of Disabled Persons and Intervention: • Factors influencing personality development of disabled individuals, Life span development of people with disabilities, Assessment of personality of disabled individuals, Screening and early identification of people with developmental disabilities. Social, Psychological Perspective in Rehabilitation Psychology. • Early intervention: definition, assessment and strategies for intervention. Intervention packages for various disabilities. Services and programmes for disabled individuals and their families in India. • Special education: aims, objectives and functions, Emerging trends in special education. Educational assessment and evaluation for persons with disabilities, Educational technology for disabled.	18
IV	Psychological Intervention: • Planning Intervention: Psychoanalytic Approach, Learning Theories and Strategies, Planning and Designing, Learning Situations, Counselling Strategies. Therapeutic services and Restorative techniques. • Guidelines of Training Programmes for Health Professionals.	12

Major Elective-4 c) Psychology at workplace

Course objective-

1. Learning organizational theory and concept.
2. To get acquainted with group dynamics.
3. Understand the skills of leadership.

Course outcome- After the completion of the course the students will be able to-

1. Acknowledged with organizational theory and concept.
2. Acquire knowledge of group dynamics.
3. Learn the skills of leadership.

Unit	Course Content	Periods
I	Foundation of Organizational Behaviour Historical context of organizational Behaviour - Contribution of Frederick Winslow Taylor, & Henri Fayol, Definition at Organizational Behaviour, Developing an Organizational Behaviour	12
II	The individual in the organization Biographical characteristics, Values, attitudes, and job satisfaction. Concept of Personality, Major Personality attributes affecting O.B., Motivation, early theories of motivation - Hierarchy of Needs theory, Theory X and Y, and Two factor theory, MBO Programs.	12
III	The Group and Team in the Organization Define and Classifying Groups, Stages of Group Development - The Five-Stage Model, An Alternative Model for Temporary Groups with Deadlines, Group Decision Making - Groups versus the Individual, Groupthink and Groupshift, Group Decision-Making Techniques. Differences Between Groups and Teams. Types of Work Teams - Problem-Solving Teams, Self-Managed Work Teams, Cross-Functional Teams, Virtual Teams. Creating Effective Teams – Context, Composition, Work Design, Process.	12
IV	Leadership and Power in the Organization What Is Leadership?, Trait Theories of Leadership ,Behavioral Theories of Leadership – Ohio State Studies, University of Michigan Studies, The Managerial Grid. Contingency Theories of Leadership- The Fiedler Model, Definition of Power, Bases of Power, Politics: Power in Action	12
V	Foundation of Organizational Structure What Is Organizational Structure? - Work Specialization, Departmentalization, Chain of Command, Span of Control, Centralization and Decentralization, Formalization. Common Organizational Designs -The Simple Structure, The Bureaucracy, The Matrix Structure. New Design Options- The Team Structure, The Virtual Organization, The Boundaryless Organization. Human Resource Selection Practice - Initial Selection, Substantive Selection, Contingent Selection. Training and Development Programs- Types of Training, Training Methods, Evaluating Effectiveness.	12

Research Project- Internship

Course objective –

1. Know application of the psychological concept
2. Acquiring skill of MSE
3. Learning diagnosis and report writing

Course outcome-

1. Knowledge of application of the psychological concept
2. Developed skill of MSE
3. Acquired skill of diagnosis and report writing

Internship to be done at the clinical settings/ mental health hospitals for 180 hrs

Students should select at least 10 types of maladapted cases in consultation with the teacher, and prepare detailed report of 10 cases. Students should present at least two cases. The following stages should be followed (wherever applicable):

- a. Taking of case history.
- b. Diagnosis.
- c. Validation in consultation with teachers.
- d. Prognosis.
- e. Writing session report of each case.
- h. Presentation of cases in classroom

GENERAL :

1. Each batch of practicum should consist of maximum 10 students.
2. A separate batch will be formed if this number exceeds even by one.
3. Workload for each batch will be equivalent to 8 lecture periods.
4. Each student should study CLINICAL CASES IN HOSPITAL / CLINIC / set up; one teacher supervisor should accompany a group of students.
5. Eligibility for the Practicum Examination is subject to Certification of Practicum by teacher-in-charge and HoD.

ASSESSMENT (100 MARKS)

a. Continuous (Internal) Assessment and Distribution of Marks (40 Marks).

1. Regular attendance at the clinical setting for 180 hrs -25
2. Presentation of case report and viva 15 marks.

b. Semester-End Examination 60 Marks.

Distribution of 60 marks

Report writing -20 marks
Viva Voce - 40marks

Each batch will consist of only 10 students

Duration of examination for each batch will be 3 hours.

Hypothetical problems will be prepared by External Examiner.

Marks for Viva and Exercise Report will be given by both examiners and average marks will be considered as final marks of the candidate.

Major Activity-3: Psychometric Testing

Course Objective:

1. To create interest in psychological phenomenon.
2. To develop awareness of psychological of psychological tools, techniques and tests.
3. To nurture the skill of observation

Course Outcome:

1. Aware of different psychological tools and techniques of assessments
2. Skillful in observation
3. Write report effectively.

Conduct tests from the following (Any Six)

1. Seguin Form Board Test.
2. WAIS/ WISC
3. MISC
4. SPM
5. BKT
6. CAT
7. Aptitude test
8. Autistic Check List
9. ADHD Check List
10. CAQ

NOTE- Each tests should be conducted on at least three clients / subjects

PRACTICUM ASSESSMENT (50MARKS)

Internal examination of 20 marks

The record book-10

Attendance -10

Internal examination will be carried out by the departmental committee.

External examination of 30 marks

The procedure -10, Report-10, Viva-10

Major Elective-3: a) Healthy Psychology

Course Objective-

1. Learn the definition and scope of Health Psychology
2. Able to identify types of pain, symptoms and suitable intervention
3. Understand theories of stress, sources of stress and coping

Course Outcome- After the completion of the course the students will be able to-

1. Outline the definition and scope of Health Psychology
2. Identify types of pain, symptoms and suitable intervention
3. Summarize theories of stress, sources of stress and coping

Unit	Course Content	Periods
I	What is health Psychology? Definition of Health Psychology, The Mind Body Relationship: A Brief History, The Rise of The Biopsychosocial Method, The need for Health Psychology, Health Psychology Research, What is health Psychology Training For?	16
II	Health Behaviours An Introduction to Health Behaviour, health Promotion: An overview, Changing Health Habits, Cognitive-Behavioural Approaches to Health Behavior Change, The Transtheoretical model of behavior change, Venues for health-habit Modification	18

Research Project- Research Project

Course Objective-

1. To apply research methods to solve a given scientific task.
2. To collect data for evaluation and for statistical treatment.
3. To use relevant scientific literature and write the report.

Course Outcome- After the completion of the course the students will be able to-

1. Use research methods to solve a given scientific task.
2. To collect data for evaluation and use statistical treatment.
3. Write the research report.

General Notes:

1. Each batch of project should consist of maximum 10 students.
2. A separate batch will be formed if this number exceeds even by one.
3. Workload for each batch will be equivalent to 8 lecture periods.
4. Students should select a problem in consultation with teacher concerned.
5. Sample size should be minimum 30 in each group .
6. Project report should be written in APA format.
7. Eligibility for the Project Examination is subject to Certification of Project by the teacher-in-charge and HoD.

Internal Assessment – 40marks

Division of marks for project report will be as follows and will be based on suitability and appropriateness of the report with respect to:

1. Problem selected, its rationale and significance & Review work –10
2. Methodology- 10
3. Data Collection-10
4. Result Interpretation- 10

External Examination – 60 marks

1. External Examination will be conducted by two examiners (one of whom will be preferably internal and one external)
2. Each batch will consist of only 10 students
3. Duration of examination for each batch will be 3 hours.
4. Marks for Project Report and Presentation & Viva-voce will be given by both examiners and the average of the same will be considered as final marks of the candidate.

Fourth Semester– Counselling and Guidance
Major Mandatory-10: Behavioural Dysfunction

Course Objective: To acquaint the students with:

1. Current systems of classification of Mental Disorders.
2. The symptomatology of different psychological disorders.
3. The etiology and dynamics of the disorders with respect to various theoretical approaches.

Course Outcome- After the completion of the course the students will be able to-

1. Classify the Mental Disorder
2. Know the symptoms of psychological disorder
3. Understand the theoretical approaches

Unit	Course Content	Periods
I	Anxiety Disorders and Obsessive Compulsive and Related Disorders Anxiety: A Conceptual Perspective, Separation Anxiety Disorder, Selective Mutism, Specific Phobias and Fears, Social Anxiety Disorder, Panic Disorder, Agoraphobia, Generalized Anxiety Disorder, Obsessive-Compulsive Disorder, Treatment	12
