

**DR. BABASAHEB AMBEDKAR MARATHWADA UNIVERSITY,
CHHATRAPATI SAMBHAJINAGAR.**

CIRCULAR NO.SU/ Sci & Tech./B.Voc/NEP/12/2024.

It is hereby inform to all concerned that, the Revised syllabi prepared by the Ad-hoc Board and recommended by the Dean, Faculty of Science & Technology **Academic Council at its meeting held on 05 June, 2024 has accepted the following New syllabi of Bachelor of Vocation under the Faculty of Science & Technology as per National Education Policy -2020 run at the University Department, Dr. Babasaheb Ambedkar Marathwada University as appended herewith.**

Sr.No	Subject Name	Semester
1.	B.Voc in Industrial Automation (Industry Embedded) (New)	I & II
2.	B.Voc in Automobile (Industry Embedded) (New)	I & II

This is effective from the Academic Year 2024-25 onwards under the Faculty of Science & Technology.

All concerned are requested to note the contents of the circular and bring notice to the students, teachers and staff for their information and necessary action.

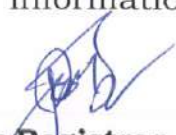

University campus,

Chhatrapati Sambhajinagar-431 004.

Ref. No.SU/B.voc./syllabus./2024-25/

Date: 03.08.2024

5014-22

**Deputy Registrar,
Academic Section.
(Syllabus)**

Copy forwarded with compliments to :-

1] **The Director, Deen Dayal Upadhyay Kaushal Kendra, Dr. Babasaheb Ambedkar Marathwada University.**

2] **The Director, University Network & Information Centre, UNIC, with a request to upload the curriculum along with this Circular on University Website.**

Copy to :-

1] **The Director, Board of Examinations & Evaluation, Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar.**

2] **The Section Officer, [B.Voc Unit] Examination Branch, Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar.**

3] **The Programmer, [Computer Unit-1] Examination Branch, Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar.**

4] **The Programmer, [Computer Unit-2] Examination Branch, Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar.**

5] **The In-charge, [E-Suvidha Kendra], Rajarshi Shahu Maharaj Pariksha Bhavan, Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar.**

6] **The Public Relation Officer, Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar.**

7] **The Record Keeper, Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar.**

PREFACE

The National Education Policy (NEP) 2020 has introduced significant reforms aimed at transforming the education landscape in India. Here's how NEP 2020 intersects with skill education:

- 1. Multidisciplinary Education:** NEP 2020 emphasizes multidisciplinary education, encouraging students to pursue a broad range of subjects and skills. This approach promotes flexibility and enables students to develop diverse skill sets tailored to their interests and career goals.
- 2. Holistic Development:** The policy advocates for holistic development, which includes not only academic learning but also social, emotional, and vocational skills. This holistic approach ensures that students are well-rounded individuals equipped to navigate various aspects of life and work.
- 3. Vocational Education and Internships:** NEP 2020 places a strong emphasis on vocational education, integrating it into mainstream curriculum from an early age. The policy encourages hands-on learning experiences, internships, and apprenticeships to provide practical skills and real-world exposure to students.
- 4. Focus on Critical Thinking and Problem-Solving:** NEP 2020 prioritizes the development of critical thinking, creativity, and problem-solving skills. These skills are essential for innovation and adaptability in a rapidly changing world and are integrated across all levels of education.
- 5. Flexible Learning Pathways:** The policy promotes flexible learning pathways, allowing students to choose their own educational trajectories based on their interests, aptitudes, and aspirations. This flexibility enables students to explore diverse skill areas and tailor their education to suit their individual needs.
- 6. Teacher Training and Professional Development:** NEP 2020 recognizes the importance of teacher training and professional development in enhancing the quality of education. The policy emphasizes continuous learning for teachers, equipping them with the knowledge and skills necessary to effectively nurture students' talents and abilities.
- 7. Digital Education and Technology Integration:** The policy advocates for the integration of digital technology in education to enhance access, equity, and quality. Digital platforms and tools are leveraged to facilitate interactive learning experiences, skill development, and personalized instruction.

By aligning with the principles and objectives of NEP 2020, skill education in India is poised to undergo a transformative shift, fostering innovation, equity, inclusivity, and excellence in education. These contexts have remained as mainframe while developing this curriculum.

The University has adapted Outcome-based education (OBE) since 2017. OBE is widely adopted in educational systems globally due to student centric advantages. OBE provides clear and measurable learning objectives that help students focus and stay motivated. It emphasizes real-world skills, bridging the gap between academia and the workforce. Customized learning paths are possible, accommodating different learning styles and promoting inclusivity. OBE focuses on mastery and competency rather than seat time, encouraging deeper learning and retention of knowledge. Continuous improvement is encouraged through ongoing assessment and feedback. OBE promotes accountability and transparency, allowing stakeholders to monitor progress and evaluate educational programs. It equips students with skills needed for the globalized economy, fostering critical thinking and collaboration. Lifelong learning skills like self-directed learning and adaptability are developed, creating a culture of continuous improvement. Overall, OBE offers a holistic approach to education, emphasizing relevant skills, competencies, and attitudes crucial for success in today's ever-changing world.

The authorities of Dr. Babasaheb Ambedkar Marathwada University, CHHATRAPATI SAMBHAJINAGAR (M.S.), remaining aligned to accreditation standards of National Assessment and Accreditation Council, decided to opt for National Education and Policy and Outcomes Based Education (OBE). As the part of the decision, different meetings, workshops and presentations were held at the campus of university.

This document is the outcome such meetings and workshops held at university level and department level. The detailed document is designed and the existing curriculum of the department has been meticulously analysed from the standpoint of the immediate and long-time requirements of manufacturing and process industries, and transformed in to the framework of NEP with OBE. This is the first step towards the implementation of NEP with OBE in the university departments and affiliated colleges. The document will serve all stakeholders in the effective implementation of the curriculum. The OBE is continuous process for quality enhancement and it will go a long way in order to enhance the competencies and employability of the graduates/Post-graduates of the university departments and affiliated colleges.

As we stand on the threshold of a new era in education, the dawn of the National Education Policy 2020 illuminates our path toward a holistic, inclusive, and progressive educational landscape. The Bachelor of Vocation (B. VOC.) curriculum outlined herein reflects the ethos and aspirations of this transformative policy, aiming to equip learners with the knowledge, skills, and values necessary to thrive in the dynamic world of the 21st century. At its core, the National Education Policy 2020 envisions an educational framework that is learner-centric, multidisciplinary, and geared towards fostering creativity, critical thinking, and innovation. It emphasizes the integration of knowledge across disciplines, breaking down traditional silos to encourage holistic understanding and application of concepts. The Bachelor of Vocation (B. VOC.) curriculum embodies these principles by offering a diverse array of courses spanning various scientific domains, while also incorporating interdisciplinary studies to nurture well-rounded graduates capable of addressing complex challenges with agility and insight. Furthermore, the curriculum is designed to promote experiential learning, research, and hands-on exploration, recognizing the importance of Lab Course engagement in deepening understanding and cultivating real-world skills. Through laboratory work, field experiences, internships, and project-based learning opportunities, students will have the chance to apply theoretical knowledge in Lab Course settings, develop problem-solving abilities, and cultivate a spirit of inquiry and discovery. Integral to the National Education Policy 2020 is the commitment to inclusivity, equity, and access to quality education for all. The Bachelor of Vocation (B. VOC.) curriculum reflects this commitment by embracing diversity in perspectives, backgrounds, and experiences, and by fostering an inclusive learning environment where every student feels valued, supported, and empowered to succeed. Moreover, the curriculum emphasizes the cultivation of ethical values, social responsibility, and global citizenship, instilling in students a sense of accountability towards society and the environment. By integrating courses on ethics, sustainability, and social sciences, the Bachelor of Vocation (B. VOC.) program aims to produce graduates who are not only proficient in their respective fields but also compassionate, ethical leaders committed to making a positive impact on the world. As we embark on this journey of educational transformation guided by the National Education Policy 2020, the Bachelor of Vocation (B. VOC.) curriculum stands as a testament to our collective vision of a more equitable, inclusive, and enlightened society. It is our hope that through rigorous academics, innovative pedagogy, and unwavering dedication to excellence, we can inspire the next generation of scientists, scholars, and change-

makers to realize their full potential and contribute meaningfully to the advancement of knowledge and the betterment of humanity.

In light of aforesaid, Dr. Babasaheb Ambedkar Marathwada University hereby proposes to offer a three years industry embedded Bachelor of Vocation program (B. VOC.) in Industrial Automation. The curriculum design of this program is undertaken with following considerations

–

The need for expert human resources in industrial automation is critical for both manufacturing and process industries due to several key factors:

1. **Technical Expertise:** Industrial automation involves complex systems such as Programmable Logic Controllers (PLCs), Supervisory Control and Data Acquisition (SCADA), Distributed Control Systems (DCS), and Industrial Internet of Things (IIoT). Expert human resources possess the technical knowledge and skills required to design, program, integrate, and troubleshoot these systems effectively.

2. **Process Optimization:** In manufacturing and process industries, optimization of production processes is essential for maximizing efficiency, reducing costs, and ensuring product quality. Expertise in industrial automation enables professionals to analyze processes, identify bottlenecks, and implement automation solutions to streamline operations and improve overall performance.

3. **Safety and Compliance:** Industrial automation systems must adhere to strict safety standards and regulatory requirements to protect workers, equipment, and the environment. Expert human resources are needed to assess safety risks, implement safety measures, and ensure compliance with industry regulations to maintain a safe and secure working environment.

4. **Reliability and Maintenance:** Industrial automation systems require regular maintenance to ensure reliable operation and minimize downtime. Expert human resources are responsible for preventive maintenance activities, such as system inspections, software updates, and equipment calibration, to prevent unexpected failures and disruptions in production.

5. **Data Analysis and Decision-Making:** Industrial automation generates vast amounts of data that can be leveraged to gain insights into production processes, identify trends, and make data-driven decisions. Expert human resources with expertise in data analysis and interpretation are essential for extracting valuable insights from automation systems and optimizing performance accordingly.

6. **Integration and Interoperability:** Manufacturing and process industries often utilize a variety of automation technologies and systems that need to seamlessly integrate and communicate with each other. Expert human resources specialize in system integration and interoperability, ensuring that different automation components work together harmoniously to achieve common objectives.

7. **Innovation and Continuous Improvement:** Expert human resources drive innovation and continuous improvement initiatives within manufacturing and process industries by exploring new automation technologies, evaluating their potential applications, and implementing innovative solutions to enhance productivity, quality, and competitiveness.

To summarize, expert human resources play a pivotal role in leveraging industrial automation to optimize processes, ensure safety and compliance, enhance reliability, and drive innovation in both manufacturing and process industries. Their technical expertise, analytical skills, and commitment to excellence are essential for achieving success in highly automated industrial environments.

The future of education is moving towards vocational education from the conventional education system prevalent in India. This is evident from the New Education Policy announced by the Government that is going to radically change the education system. The

vocational education system is already successfully functioning in various countries across the globe. Students from the lower strata of the society who are deprived of higher education due to their financial constraints can benefit hugely from the program. Also, students who had to drop out after completion of their 12th or equivalent educational qualification can enroll into the program.

B.Voc Industrial Automation (Industry Embedded) program is an outcome of critical brainstorming towards catering the needs of the working professionals who are working in the Industries and want to pursue their higher education. The collaboration between Dr. BAMU and large spectrum of industries underscore their shared commitment to promoting innovation, excellence, and employability in higher education. Together, they aim to nurture a generation of skilled professionals equipped to drive positive change and contribute meaningfully to the workforce and society at large.

This Program will bridge the gap between academia and industry. This B.Voc Industrial Automation (Industry Embedded) Program will be a 3 Year degree program. This program will be in blended mode. Theory will be taught by the University Faculty Members in online mode and assignments will be collected collaboratively by faculty members and Industry personnel. Practicals will be taught at the Industry premises by Industry experts. Evaluation of Theory will be done in online mode as per pattern designed in the department by the University and the practical evaluation will be done by the Industry experts and evaluation sheets will be sent to the University as per stipulated period . University Academic calendar and Exam timetable will be strictly followed by the Industries for theory and practical related activities.

Structure of

Bachelor of Vocation (B.VOC) Industrial Automation (Industry Embedded)

Three Year Degree Program

B.VOC. First Year: 1st Semester

Course Type	Course Code	Course Name	Teaching Scheme (Hrs / Week)		Credits Assigned		Total Credits
			Theory	Lab Course	Theory	Lab Course	
Major (Core) M1 Mandatory	IA(IE)/DSC/T/100	Semiconductor Devices	2		2		2+2 = 4
	IA(IE)/DSC/P/126	Lab Course based on IA/DSC/T/100		4		2	
Major (Core) M2 Mandatory	IA(IE)/DSC/T/101	Digital Electronics	2		2		2+2 = 4
	IA(IE)/DSC/P/127	Lab Course based on IA/DSC/T/101		4		2	
Major (Core) M3 Mandatory	IA(IE)/DSC/T/102	Basic Industrial Measurements	2		2		2+2 = 4
	IA(IE)/DSC/P/128	Lab Course based on IA/DSC/T/102		4		2	
Generic / Open Elective (GE/OE) (Choose any one from pool of courses) It should be chosen compulsorily from the faculty other than that of Major	IA(IE)/GE/OE/T/100	Introduction to Industrial Manufacturing	2		2		2
SEC (Skill Enhancement Courses) (Choose any one from pool of courses)	IA(IE)/SEC/T/100	Basic Electrical	1		1		1+1= 2
	IA(IE)/SEC/T/101	Basic Computing	1		1		
	IA(IE)/SEC/P/126	Lab Course's based on IA/SEC/T/100		2		1	
	IA(IE)/SEC/P/127	Lab Course's based on IA/SEC/T/101		2		1	
AEC, VEC, IKS	IA(IE)/AEC/T/100	English (Common for all the faculty)	2		2		2+2 =4
	IA(IE)/IKS/T/101	Choose any one from pool of courses	2		2		
OJT/ FP/CEP/CC/RP	IA(IE)/CC/P/126	Health and Wellness (Common for all the faculty)		4		2	2
			13	18	13	09	22

**Bachelor of Vocation (B.VOC) Industrial Automation (Industry Embedded)
Three Year Degree Program**

B.VOC. First Year: 2nd Semester

Course Type	Course Code	Course Name	Teaching Scheme (Hrs / Week)		Credits Assigned		Total Credits
			Theory	Lab Course	Theory	Lab Course	
Major (Core) M1 Mandatory	IA(IE)/DSC/T/150	Applied Fluidics - 1	2		2		2+2 = 4
	IA(IE)/DSC/P/176	Lab Course based on IA/DSC/T/150		4		2	
Major (Core) M2 Mandatory	IA(IE)/DSC/T/151	Applied Fluidics - II	2		2		2+2 = 4
	IA(IE)/DSC/P/177	Lab Course based on IA/DSC/T/151		4		2	
Major (Core) M3 Mandatory	IA(IE)/DSC/T/152	Discrete State Process Control	2		2		2+2 = 4
	IA(IE)/DSC/P/178	Lab Course based on IA/DSC/T/152		4		2	
Generic / Open Elective (GE/OE) (Choose any one from pool of courses) It should be chosen compulsorily from the faculty other than that of Major	IA(IE)/GE/OE/T/150	Programmable Logic Controllers	2		2		2
VSC (Vocational Skill Courses) (Choose any one from pool of courses)	IA(IE)/VSC/T/150	Elements of Control Panel	1		1		1+1=2
	IA(IE)/VSC/T/151	Operational Amplifiers	1		1		
	IA(IE)/VSC/P/176	Lab Courses based on IA/VSC/T/150		2		1	
	IA(IE)/VSC/P/177	Lab Courses based on IA/VSC/T/151		2		1	
AEC, VEC, IKS	IA(IE)/AEC/T/150	English (Common for all the faculty)	2		2		2+2 =4
	IA(IE)/VEC/T/151	Constitution of India (Common for all the faculty)	2		2		
OJT/ FP/CEP/CC/RP	IA(IE)/CC/P/176	Yoga Education / Sports and Fitness (Common for all the faculty)		4		2	2
			13	18	13	09	22
Exit Option : Award of UG Certificate in 3 Majors with 44 credits and an additional 4 credits of core NSQF course / Internship OR continue with Major and Minor							

Programme Educational Objectives (PEOs) :

Programme Educational Objectives (PEOs) for the Bachelor of Vocation Curriculum under the National Education Policy 2020:

1. **Mastery of Discipline-Specific Knowledge:** Graduates of the Bachelor of Vocation program will demonstrate a deep understanding of fundamental principles, theories, and methodologies in their chosen scientific discipline, enabling them to analyze complex problems, propose innovative solutions, and contribute to advancements in their field.
2. **Interdisciplinary Proficiency:** Graduates will possess the ability to integrate knowledge and skills from multiple scientific disciplines, fostering a holistic approach to problem-solving and innovation. They will be equipped to address multifaceted challenges by drawing upon diverse perspectives and methodologies.
3. **Critical Thinking and Analytical Skills:** Graduates will develop strong critical thinking abilities, enabling them to evaluate information rigorously, analyze data effectively, and make informed decisions based on evidence. They will demonstrate proficiency in applying logical reasoning and scientific methods to solve problems and generate new knowledge.
4. **Leadership and Innovation:** Graduates will demonstrate leadership qualities and entrepreneurial mindset, capable of initiating and driving positive change in their organizations and communities. They will exhibit creativity, resilience, and adaptability, harnessing innovation to address complex challenges and seize opportunities for growth and advancement.
5. **Global Citizenship and Cultural Sensitivity:** Graduates will possess a global perspective and cultural sensitivity, recognizing the interconnectedness of diverse communities and the importance of collaboration across borders. They will engage in cross-cultural dialogue, embrace diversity, and contribute to the advancement of knowledge and understanding on a global scale.

These Programme Educational Objectives serve as guiding principles for the Bachelor of Vocation curriculum, reflecting our commitment to nurturing well-rounded graduates who are prepared to excel in their careers, contribute to society, and lead meaningful lives in a rapidly changing world.

Program Outcomes (PO):

Vocational Education is education that prepares the students for specific trades, crafts and careers at various levels and scopes. Scope of modern fabric of vocational education builds Human resource from a trade/ craftsmanship, technician or professional position in R & D organizations.

The Program Outcomes are the skills and knowledge which the students have at each exit level/at the time of graduation. These Outcomes are generic and are common to all exit levels mentioned in the programme structure. Graduates of the B.Voc program are expected to -

PO1. Apply broad based fundamental knowledge of the specific skill-based trade for the solution of target skill sector.

PO2. Identify industry domain related problems at varied complexity and analyze the same to formulate/ develop substantiated conclusion using first principles of domain sectors and technical literature.

PO3. Design / develop solutions for broad based problems in the target skill-based trade to address changing challenges put forward by market demand/ stakeholder

PO4. Design and conduct technology enabled experiments, analyze the resulting data and interpret the same to provide valid conclusions

PO5. Use the techniques, skills and modern tools necessary skill-based trade to practice with clear understanding of limitations.

PO6. Apply broad understanding of ethical and professional skill-based trade practice in the context of global, economic, environmental and societal realities while encompassing relevant contemporary issues.

PO7. Apply broad understanding of impact of skill-based trade in a global, economic, environmental and societal context.

PO8. Apply ability to develop practical solutions for skill trade problems within positive professional and ethical boundaries.

PO9. Function effectively as a leader and as well as team member in diverse/multidisciplinary environments.

PO10. Communicate effectively in oral and written format addressing specific professional/social demands.

PO11. Demonstrate knowledge and understanding of the first principles of skill trade and apply these to one's own work as a member and leader in a team, to complete project in any environment.

PO12. Recognize the need for and have the ability to acquire advance knowledge for addressing the changing technological demands of the target skill trade.

Program Specific Outcomes (PSO):

Graduates of the B.Voc (Industrial Automation) program are expected to -

1. Apply broad based fundamental knowledge of electronics, electrical, mechatronics fundamentals and Industrial automation specialization for the solution of automated manufacturing and process related problems.
2. Identify industrial automation related problems at varied complexity and analyze the same to formulate/ develop substantiated conclusion using first principles of electronics, electrical , mechatronics and technical literature.
3. Design and conduct technology enabled experiments, analyze the resulting data and interpret the same to provide valid conclusions.
4. Use the techniques, skills and modern tools necessary for industrial automation practice with clear understanding of limitations.

Eligibility:

Working professionals with 10+2 / MCVC/ ITI (two years) with relevant/equivalent trade from any recognized Board/Institution are eligible for registration/ admission to first year (Semester I) of B.Voc Industrial Automation Degree program.

Exit Options:

The programme allows exit of a student in an intermediate stage, on successful employment. Scopes will be there for further continuation of study. The other wise exit options will be as follows-

<i>Exit Point</i>	<i>Duration</i>	<i>Diploma / Degree to be Offered</i>
First exit	After 1 yr.	Certificate in Vocation
Second exit	After 2 yrs.	Diploma in Vocation
Third exit	After 3 yrs.	Bachelor in Vocation (B. Voc.)

Admission / Promotion Process:

In response to the advertisement for registration, interested students will have to register themselves. Admission should be done on the basis of performance of students at Common Entrance Test (CET). The CET will be conducted in the month of June every year.

A candidate who has sought admission to Semester – I shall be admitted to Semester – II automatically. A candidate who has passed 75% of the papers at First Year (First and Second Semesters together) examinations shall be allowed to take admissions in third semester.

Similarly, a candidate who has passed 75% of the papers at the Second Year (Third and Fourth Semesters together) examinations shall be allowed to take admission to the Fifth semester. However, if a candidate has not passed the First and Second Semester examinations, he shall not be allowed to take admission to the Fifth Semester. Appearance in the First, Third and Fifth semester is compulsory to get promoted to next semester.

For obtaining B. Voc. Degree, a student will have to complete all semesters successfully within 06 years/12 semesters. It also offers multiple exit/entry. Students can exit after completion of one year and can enter into the system (subsequent year) with 5 years from the date of first time registration.

Dropout students will be allowed to register for respective semester as and when the concerned courses are offered by the department, **HOWEVER HE / SHE SHOULD NOT EXCEED MORE THAN TWICE THE DURATION OF THE COURSE FROM THE DATE OF FIRST REGISTRATION AT PARENT DEPARTMENT / COLLEGE.** The admission of the concern student will be automatically cancelled if he / she fails to complete the B. VOC. degree within a period of maximum six years / twelve semesters.

Choice Based Credit System (CBCS):

The choice-based credit system is going to be adopted. This provides flexibility to make the system more responsive to the changing needs of our students, the professionals and society. It gives greater freedom to students to determine their own pace of study. The credit-based system also facilitates the transfer of credits.

- Students will have to earn 44 credits for the award of one year Certificate in Vocation
- Students will have to earn 88 credits for the award of two year Diploma in Vocation
- Students will have to earn 132 credits for the award of three year Bachelor Degree in Vocation (B. Voc.)

Credit-to-contact hour Mapping:

- (a) One Credit would mean equivalent of 15 contact hours for theory lecture.
- (b) For lab course/ workshops/internship/field work/project, the credit weightage for equivalent hours shall be 50% that for lectures /workshop.
- (c) For self- learning, based on e-content or otherwise, the credit weightage for equivalent hours of study should be 50% or less of that for lectures/workshops.

Teaching

Following academic calendar of University, Theory will be taught by the University Faculty Members in online mode and practicals will be taught at the Industry premises by Industry experts. Assignments will be collected collaboratively by University faculty members and Industry experts. Evaluation of Theory will be done in online mode by the University as per pattern designed by the University and the practical evaluation will be done by the Industry experts and evaluation sheets will be sent to the University within stipulated period. Academic calendar and Exam timetables of University will be followed by the Industries.

Attendance:

Students must have 75 % of attendance in industries for practical and 75 % of attendance(Online mode) in each theory course for appearing examination otherwise he / she will not be strictly allowed for appearing the examination of each course. Frequent absence from regular theory/Laboratory course may lead to disqualification from continuous assessment test (CAT) process in respective subject.

Departmental Committee:

The Departmental Committee (DC) of the Centre will monitor smooth functioning of the program. It will also monitor the presence of students in Industries (by contacting the respective mentor from Industry). As this program is specially for working professionals.

Results Grievances / Redressal Committee

Grievances / Redressal committee should be constituted in the department to resolve all grievances relating to the evaluation. The committee shall consist of Head of the department, the concerned teacher of a particular course and senior faculty member of Department of Committee and one industry expert from Industry. The decision of Grievances / Redressal committee will have to be approved by Department committee.

Evaluation Methods:

Formative assessment is an efficient method to evaluate students' comprehension, learning needs, and academic progress. It offers immediate feedback, enhanced student engagement, personalized learning, improved learning outcomes, and encourages self-assessment. It reduces test anxiety, facilitates differentiation, enhances instructional practices, supports collaborative learning, fosters continuous improvement, encourages a growth mindset, and builds confidence. Formative assessment also reduces test anxiety by lowering the stakes, ensuring all students receive appropriate challenges and support. It also supports a culture of continuous improvement and fosters a growth mindset among students.

This program will adapt Formative assessment/ Continuous Internal Assessments for each theory course in following format –

- 1. Module-wise Online Tests – 10 Marks (*03 tests) = 30 marks**
- 2. Online Assignment/Mini Project = 10 Marks**
- 3. Online Seminar Presentation = 10 Marks**

1. Module-wise Online Tests 10 Marks (*03 tests) = 30 marks

Module-wise Online Tests will be conducted in each theory course immediately after completion of teaching with individual module. Such tests will be of 10 marks comprising of Part A and B.

- Part A will be consisting of 05 questions having 01 mark each (multiple choice questions / fill in the blanks/ answer in one sentence) as compulsory questions and it should cover entire module syllabus (05 Marks)
- Part B will contain 03 questions of 05 marks from module contents, from which students will have to attempt any one.

Every Module-wise Test will be followed by a remedial test. Any student, who has missed to appear for a test can appear for the remedial test. Or if any student wants to improve their performance of main test, will be allowed to appear for remedial test. For all students, who have appeared for main test as well as remedial test, the best performance will be considered for final marks memo preparation.

2. Online Assignment/Mini Project = 10 Marks

This will remain a group activity and concerned faculty will have to provide Online assignment/tasks that will lead to incubation of critical and creative thinking ability of students. Depending upon contents of a course, the faculty member may assign a mini project to a group of students as well. However assignment and project will not be given concurrently.

3. Online Seminar Presentation = 10 Marks

Individual student should deliver a seminar based on topics covered through course contents or topics related to course content. Evaluation of a seminar has to be carried out by course faculty member/ industry expert and an external faculty member.

A Semester End Examination (SEE) for a certain / all theory courses will be conducted in University premises only for students who will fall short in obtaining passing marks for respective course through the process of formative assessment. Following will be the pattern of SEE Question Paper –

The Question Paper will be of 50 marks consisting of Part A, Part B and Part C

- Part A will be consisting of 10 questions having 01 mark each (multiple choice questions / fill in the blanks/ answer in one sentence) as compulsory questions and it should cover entire module syllabus (10 Marks)
- Part B will contain 09 questions of 05 marks each from module contents, from which students will have to attempt any seven questions. Contents of each module should contribute towards framing of 03 questions. (35 Marks)
- Part C will contain 03 questions of 05 Marks each, from which students will have to attempt any one question. This question should critically look forward to evaluate critical applied thinking capability of a student. Contents of each module should contribute towards framing of 01 question. (05 Marks)

Semester end practical examination and evaluation will be conducted by the Industry experts in Industry premises at the end of each semester following University Timetable. Final marks of practicals will be communicated to the University.

Earning Credits:

At the end of every semester, a letter grade will be awarded in each course for which a

student had registered. A student's performance will be measured by the number of credits that he/she earned by the weighted Grade Point Average (GPA). The SGPA (Semester Grade Point Average) will be awarded after completion of respective semester and the CGPA (Cumulative Grade Point Average) will be awarded at the respective exit point.

Grading System:

The grading reflects a student-own proficiency in the course. A ten-point rating scale shall be used for the evaluation of the performance of the students to provide letter grade for each course and overall grade for the Bachelor Programme. Grade points are based on the total number of marks obtained by him / her in all heads of the examination of the course. The grade points and their equivalent range of marks are shown in Table-I

Table – I: Ten point grade and grade description

Marks Obtained (%)	Grade Point (GPA/CGPA)	Letter Grade	Description
90-100	9.00- 10	O	Outstanding
80-89	8.00-8.99	A ⁺	Excellent
70-79	7.00-7.99	A	Very Good
60-69	6.00-6.99	B ⁺	Good
55-59	5.50-5.99	B	Above Average
50-54	5.00-5.49	C	Average
40-49	4.00-4.99	P	Pass
Below 40	Below 4.0	F	Fail
Absent	Absent	Ab	Absent

- Non-appearance in any examination / assessment shall be treated as the students have secured zero marks in that subject examination / assessment.
- Minimum P grade (4.00 grade points) shall be the limit to clear / pass the **course / subject. A student with F grade will be considered as —failed in the** concerned course and he / she has to clear the course by appearing in the next successive semester examinations. There will be no revaluation or recounting under this system.
- Every student shall be awarded grade points out of maximum 10 points in each subject (based on 10 point scale). Based on the grade points obtained in each subject, Semester
- Grade Point Average (SGPA) and then Cumulative Grade Point Average (CGPA) shall be computed. Results will be announced at the end of each semester and CGPA will be given at respective exit point.

Computation of SGPA (Semester Grade Point Average) and CGPA (Cumulative Grade Point Average)

Grade in each subject / course will be calculated based on the summation of marks obtained in all five modules.

The computation of SGPA and CGPA will be as below

- Semester Grade Point Average (SGPA) is the weighted average points obtained by the students in a semester and will be computed as follows:

$$\text{SGPA} = \frac{\text{Sum (Course Credits) X Number of Grade Points in concerned Course Gained by the Student}}{\text{Sum (Course Credits)}}$$

- The SGPA will be mentioned on the grade card at the end of every semester.
- The Cumulative Grade Point Average (CGPA) will be used to describe the overall performance of a student in all semester of the course and will be computed as under.

$$\text{CGPA} = \frac{\text{Sum (All six Semester SGPA)}}{\text{Total Number of Semester}}$$

- The SGPA and CGPA shall be rounded off to the second place of decimal.

Grade Card

Results will be declared by the Centre and the grade card (containing the grades obtained by the student along with SGPA) will be issued by the university after completion of every semester. The grade card will be consisting of following details.

- Title of the courses along with code opted by the student. Credits associated with the course.
- Grades and grade points secured by the student.
- Total credits earned by the student in a particular semester. Total credits earned by the students till that semester.
- SGPA of the student.
- CGPA of the student (at respective exit point).

Cumulative Grade Card

The grade card showing details grades secured by the student in each subject in all semesters along with overall CGPA will be issued by the University at respective exit point.

Syllabus for Semester – I

B.VOC Industrial Automation

Subject (Major): INDUSTRIAL AUTOMATION

B. VOC. First Year: 1st Semester

Course Type	Course Code	Course Name	Teaching Scheme (Hrs / Week)		Credits Assigned		Total Credits
			Theory	Lab Course	Theory	Lab Course	
Major (Core) M1 Mandatory	IA(IE)/DSC/T/100	Semiconductor Devices	2		2		2+2 = 4
	IA(IE)/DSC/P/126	Lab Course based on IA/DSC/T/100		4		2	
Major (Core) M2 Mandatory	IA(IE)/DSC/T/101	Digital Electronics	2		2		2+2 = 4
	IA(IE)/DSC/P/127	Lab Course based on IA/DSC/T/101		4		2	
Major (Core) M3 Mandatory	IA(IE)/DSC/T/102	Basic Industrial Measurements	2		2		2+2 = 4
	IA(IE)/DSC/P/128	Lab Course based on IA/DSC/T/102		4		2	
Generic / Open Elective (GE/OE) (Choose any one from pool of courses) It should be chosen compulsorily from the faculty other than that of Major	IA(IE)/GE/OE/T/100	Introduction to Industrial Manufacturing	2		2		2

			13	18	13	09	22

Major (Core) Courses

IA(IE)/DSC/T/100 : Semiconductor Devices

Total Credits : 02

Total Contact Hours : 30 Hrs

Maximum Marks : 50

Learning Objectives of the Course: To provide students with-

1. Basic concepts and behavior of semiconductor devices
2. Application concepts of Semiconductor devices

Course Outcomes (COs) :

On completion of the course, students should be able to -

1. Discuss basic operation of semiconductor devices used in low power and power electronics domain
2. Explain characteristics of semiconductor devices used in low power and power electronics domain
3. Evaluate role of various Semiconductor Devices in different types applications

CO –PO – PSO Articulation Matrix

CO2	H	H	H	H									H	M	M	
CO3	H	H	H	H									H	M	M	

Module No.	Course Content	Contact Hours
I	Semiconductor Basics and Two Terminal Devices	10 Hrs
	Atomic Structure, Band Theory of Semiconductors, Types of Semiconductors, Formation of Junctions. Diode- Diode Characteristics, Diode Applications, Special Purpose Diodes	
II	Three Terminal Devices	10 Hrs
	Bipolar Junction Transistor (BJT)- BJT Biasing, BJT Characteristics, BJT Applications	
	Junction Field Effect Transistor (JFET)- JFET Biasing, JFET Characteristics, JFET Applications Metal-Oxide Semiconductor Field Effect Transistor (MOSFET)- MOSFET Biasing, MOSFET Characteristics, MOSFET Applications	
III	Power Electronic Devices	10 Hrs
	Silicon Controlled Rectifier (SCR) – SCR Operation, DC Operational circuit, Turn-on/off, Gate Triggering; DIAC; TRIAC; IGBT; Application of Power electronic devices	

Text Books:

IA(IE)/DSC/P/126 : Lab-Course based on IA(IE)/DSC/T/100

Total Credits : 02

Total Contact Hours : 60 Hrs

Maximum Marks : 50

The list of practicals for above course will be provided after commencement of program in consultation with Industry experts.

IA(IE)/DSC/T/101 : Digital Electronics

Total Credits : 02

Total Contact Hours : 30 Hrs

Maximum Marks : 50

Learning Objectives of the Course:

To provide students with-

1. Fundamental concepts of Boolean Electronics
2. Ideas of developing combinational logic circuits

Course Outcomes (COs) :

On completion of this course, students should be able to-

1. Discuss basic operation of Digital Electronics Components
2. Apply laws of Boolean algebra for simplification of digital circuits, conversion of logic expression to circuit diagram and vice versa
3. Correlate operations of fundamental combinational logic circuits

CO –PO – PSO Articulation Matrix

IA(IE)/DSC/P/127 : Lab-Course based on IA(IE)/DSC/T/101

Total Credits : 02
Marks : 50

Total Contact Hours : 60 Hrs Maximum

The list of practicals for above course will be provided after commencement of program in consultation with Industry experts.

IA(IE)/DSC/T/102 : Basic Industrial Measurements

Total Credits : 02
Hrs Maximum Marks : 50

Total Contact Hours : 30

Learning Objectives of the Course:

To provide students with-

1. fundamental concepts of measurement and instrumentation system
2. basic modalities of industrial temperature, pressure, flow and level measurement

Course Outcomes (COs) :

On completion of the course, students should be able to-

1. Describe primary blocks of an Instrumentation System and Qualities of Measurement.
2. Select transducers as per application demand
3. Describe operation of basic transducers employed for industrial process parameter monitoring applications

CO –PO – PSO Articulation Matrix

IA(IE)/DSC/P/128 : Lab-Course based on IA(IE)/DSC/T/102	
Total Credits : 02	Total Contact Hours : 60 Hrs
Maximum Marks : 50	
<i>The list of practicals for above course will be provided after commencement of program in consultation with Industry experts.</i>	

General Elective/
Open Elective
Course

IA(IE)/SEC/T/100 : Introduction to Industrial Manufacturing

Total Credits : 2

Total Contact Hours : 30 Hrs

Maximum Marks : 50

Learning Objectives of the Course:

To provide overview of the vast world of manufacturing to learners

Course Outcomes (COs) :

On completion of the course, students should be able to-

1. Recognize the outlay of manufacturing operations in industry
2. Correlate elements of manufacturing operation
3. Categorize support systems for industrial manufacturing

Module No.	Course Content	Contact Hours
I	Introductory Concepts	10 Hrs
	Introductory Concepts, Production System Facilities, Automation in Production Systems, Manual Interventions in Production Systems, Automation Principle and strategies, Manufacturing operations	
II	Concepts of Automated Manufacturing	10 Hrs
	Process Industries V/s Discrete Manufacturing Industries, Basic Elements of an Automated System, Levels of Automation, Advanced Automation functions, Industrial Control Systems	
III	Manufacturing Support System	10 Hrs
	Product Design, Quality Function Deployment, Production Planning and Control Systems, Lean Production and wastes, JIT Concepts, Worker Involvement	

Text Books:

Mikell P. Groover, "Automation, Production Systems, and Computer-Integrated Manufacturing", Fourth Edition, Pearson, 2014

Skill Enhancement Courses

IA(IE)/SEC/T/100 : Basic Electrical

Total Credits : 01
Marks : 25

Total Contact Hours : 15 Hrs Maximum

Learning Objectives of the Course: To provide students with-

1. Fundamental concepts of Single and Three Phase AC
2. Operational Concept of Transformers

Course Outcomes (COs) :

On completion of the course, students should be able to-

1. Describe basic parameters in three phase AC
2. Analyze voltage and current measurements in three phase AC circuits
3. Explain basic transformer operation

CO –PO – PSO Articulation Matrix

IA(IE)/SEC/T/101 : Basic Computing

Total Credits : 01

Total Contact Hours : 15 Hrs

Maximum Marks : 25

Learning Objectives of the Course:

1. To introduce students to the world of computers
2. To provide students with basic office management tools in computer

Course Outcomes (COs) :

On completion of the course, students should be able to-

1. Recognize operational parts of computing system
2. Identify building blocks of a digital documentation platform
3. Articulate operational features of spreadsheet
4. Illustrate operational features of a digital presentation platform

CO –PO – PSO Articulation Matrix

Exit Option : Award of UG Certificate in 3 Majors with 44 credits and an additional 4 credits of core NSQF course / Internship OR continue with Major and Minor							

Major (Core) Courses

IA(IE)/DSC/T/150 : Applied Fluidics - I

Total Credits : 02

Total Contact Hours : 30 Hrs

Maximum Marks : 50

Learning Objectives of the Course:

1. To acquaint students with the basic components of hydraulic control
2. To equip students with fundamental tools for basic hydraulic circuit design

Course Outcomes (COs) :

On completion of the course, students should be able to -

1. Recognize basic hydraulic elements in a standard circuit
2. Describe operation of basic hydraulic actuators/ control elements
3. Construct circuit diagram for basic hydraulic circuits according to application demand

CO-PO-PSO Articulation Matrix

<i>The list of practicals for above course will be provided after commencement of program in consultation with Industry experts.</i>	

IA(IE)/DSC/T/152 : Discrete State Process Controllers	
Total Credits : 02	
Total Contact Hours : 30 Hrs	Maximum Marks : 50
Learning Objectives of the Course:	
<ol style="list-style-type: none"> 1. To introduce students to general hardware specifications of Programmable Logic Controllers and I/O devices 2. To develop concepts for creating ladder diagram from process control description 3. To equip students with basic level software tools for application of PLC in real-time operating conditions 	
Course Outcomes (COs) :	
On completion of the course, students should be able to-	
<ol style="list-style-type: none"> 1. Recognize Relays and PLCs as building block of Industrial Automation 	

2. Identify I/O terminals/ connections of a PLC in generic control circuits
3. Develop PLC wiring diagrams and Ladder Diagrams for basic control applications
4. Develop PLC program using Timers and Counters

CO-PO-PSO Articulation Matrix

IA(IE)/DSC/P/178 : Lab-Course based on IA(IE)/DSC/T/152

Total Credits : 02

Total Contact Hours : 60 Hrs

Maximum Marks : 50

The list of practicals for above course will be provided after commencement of program in consultation with Industry experts.

General Elective/ Open Elective Course

IA(IE)/GE/OE/T/ 150 : Programmable Logic Controllers

Total Credits : 02

Total Contact Hours : 30 Hrs

Maximum Marks : 50

Learning Objectives of the Course:

1. To introduce students to general hardware specifications of Programmable Logic Controllers and I/O devices
2. To develop concepts for creating ladder diagram from process control description
3. To equip students with basic level software tools for application of PLC in real-time operating conditions

Course Outcomes (COs) :

On completion of the course, students should be able to-

1. Recognize Relays and PLCs as building block of Industrial Automation
2. Identify I/O terminals/ connections of a PLC in generic control circuits
3. Develop PLC wiring diagrams and Ladder Diagrams for basic control applications
4. Develop PLC program using Timers and Counters

IA(IE)/VSC/T/150 : Elements of Control Panel

Total Credits : 02

Total Contact Hours : 30 Hrs

Maximum Marks : 50

Learning Objectives of the Course: To provide students with-

1. foundation electrical concepts required for Control Panel Wiring
2. To acquaint students with electrical safety measures while working in AC circuits
3. To provide students with application concepts about different components of Control Panel

Course Outcomes (COs) :

On completion of the course, students should be able to -

1. Identify components installed in a control panel and recognize their role in overall operation
2. Apply basic electrical safety measures while working in AC circuits
3. Conceptualize front panel and back panel layout of an MCC with standards

CO –PO – PSO Articulation Matrix

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3	PSO4
CO1	H	H	H	H	M								H	H	H	
CO2	H	H	H	H	M								H	H	H	
CO3	H	H	H	H	M								H	H	H	

Module No.	Course Content	Contact Hours
I	<p>Foundation Elements</p> <p>Review of concepts - Current, Voltage and Power, AC & DC; Line, Neutral, and Earth; 1-ph (LN), 3- ph (RYB - N), Star and Delta Connections, Current and Voltage relations in Star and Delta Connections, Relays; Personal Safety-Guidelines; Use of Rubber soled Shoes, Gloves and Goggles, Conductivity of Water, Earthing Pit, Earthing Plates & Strips, ESD; Drawings – Types, Wiring Diagram, Elementary Diagram, Single Line Diagram; Symbols</p>	10 Hrs
II	<p>Basic Panel Elements and Cables</p> <p>Introduction of a typical Control Panel (MCC) – Front Panel and Back End Overview; Power Supply, Busbar, SFUs, MCB, ELCB, RCCB and MPCB, Contactors and Auxiliary Contactors (NO/NC); Push Buttons, NO/NC Elements, Selector/Key Switches, CT and PT, Voltmeter, Ammeter, Energy meter, Multifunction Meter; Terminal Blocks & Din Rails, Plasticrunking, Connector blocks; Indicators, Alarm Annunciators; Timers, Counters. Wire types and preparation - Insulation materials, Conductors, Wire specifications, Standard Wire Gauge, Coaxial and screened wire, Multiway cables, Insulation removal, Forming the wire, Soldering, Crimped joints, Screw clamp terminals; Cable/Wire specification</p>	10 Hrs
III	<p>Control Panel Wiring and Troubleshooting</p> <p>SLD Preparation (Basic Concepts), Determining BOQ of Components, Checking received material for specifications as per drawing, Creating Channel layout, Selecting the correct Conductor, Testing for Shorts / Continuity, Cutting required lengths, Using Ferrules & Cable lugs, Terminal Tightening Torque, Checking the circuits, Dressing the Cables, Using Cable Glands (Single Compression /Double Compression), Cable forming – Cable forms, Continuous lacing, Breakouts, Spot ties, Laying the wires, Twisted pairs, Cable markers, Connections and Conductor and cable runs, Conductors of different circuits; Earthing the protective bonding circuit Screen connections, System earth terminals; Testing Power Supply, Testing Relays & Contactors, Testing CT/PT, Testing Pushbuttons, Indicating</p>	10 Hrs

Lamps & Selector Switches, Ammeter & Energy meter, Testing Voltmeter, Troubleshooting of Control Panels

IA(IE)/VSC/P/176 : Lab-Course based on IA(IE)/VSC/T/150

Total Credits : 02

Total Contact Hours : 30 Hrs Maximum

Marks : 50

The list of practicals for above course will be provided after commencement of program in consultation with Industry experts.

IA(IE)/VSC/T/151: Operational Amplifiers

Total Credits : 02

Total Contact Hours : 30 Hrs Maximum

Marks : 50

Learning Objectives of the Course:

To provide students with-

1. Fundamental concepts of Operational Amplifiers
2. Ideas of developing various applications of Operational Amplifiers
3. Recognize OP-AMPS for building systems to develop application oriented platforms

Course Outcomes (COs) :

On completion of this course, students should be able to-

1. Discuss basic operation of Operational Amplifiers
2. Apply laws of Boolean algebra for simplification of digital circuits, conversion of logic expression to circuit diagram and vice versa
3. Correlate operations of fundamental combinational logic circuits

CO –PO – PSO Articulation Matrix

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3	PSO4
CO1	H	H	H	H	L								H	H	H	L
CO2	H	H	H	H	L								H	H	H	L
CO3	H	H	H	H	L								H	H	H	L

Module No.	Course Content	Contact Hours
I	Integrated circuits	10 Hrs
	An over view of IC design technology, Introduction to wafer cleaning, photolithography, Ion implantation. Classification of IC families and their comparison. Study of data sheets of 741, 301, OP-07 and 324. Op-amp ideal characteristics and op-amp parameters.	
II	OP-amp with positive and negative feedback	10 Hrs
	Inverting, Non inverting and differential amplifier configuration and their special cases. Summing, scaling, averaging, instrumentation amplifier, integrator and differentiator, V to I and I to V converters.	
III	Oscillator, Comparators and converters	10 Hrs
	Phase shift oscillator, Wein bridge oscillator, square wave, triangular wave and saw tooth wave generators, Basic comparators, schmitt trigger, D/A converters and A/D converters	

Text Books:

1. Ramakant A. Gaikwad, Op-amp and Integrated circuits, Fourth edition, PHI Publication, 2002.
2. Sergio Franco, Design with Op-amp and Analog Integrated circuits, Tata McGraw Hill Edition, New Delhi, 2014
3. Robert F. Coughlin and Frederick F. Driscoll, Operational Amplifiers and Linear Integrated Circuits.2015

Reference Books:
